Chapter 01 - Preface

Please read this page before preparing your Crossy Road Arcade product for game play.

The following safety instructions apply to all game operators and service personnel. Specific warnings and cautions will be included throughout this manual.

Use the following safety guidelines to help protect the system from potential damage and to ensure your personal safety:

- Electronic components in the game cabinet run on 110V AC 60Hz (220V/ 50Hz in most of Europe, the Middle East and the Far East delivered units).

- To help prevent electric shock, plug the system into a properly grounded power source. These cables are equipped with 3-prong plugs to help ensure proper grounding. Do not use adapter plugs or remove the grounding prong from a cable. If you must use an extension cable, use a 3-wire cable with properly grounded plugs.

- To help protect your system from sudden increases and decreases in electrical power, use a surge suppressor, line conditioner or Uninterruptible Power Supply (UPS).

- Be sure nothing rests on the system's cables and that the cables are not located where they can be stepped on or tripped over.

- Keep your system far away from radiators and other heat sources.

- Do not block cooling vents.

Precaution for Game Operation

Adrenaline Amusements Inc. assumes no liability for injuries incurred while playing our games.

Operators should be aware that certain health and physical conditions may make people susceptible to injury when playing video games.

Safety

To avoid electrical shock, unplug the cabinet before performing installation or service procedures.

If a power cord is damaged, it must be replaced by the equivalent power cord available from your distributor.

Adrenaline Amusement Inc. assumes no liability for any damages or injuries incurred while setting up or servicing the cabinet. Only qualified service personnel should perform installation or service procedures.

Environmental Conditions

Cabinet is intended for indoor use only. Be sure to keep the cabinet dry and maintain operating temperatures of 59° - 86°F (15° - 30°C).

Chapter 05 - Service & Repair

Computer Connections

ADRENALINE
aagames.com
Troubleshooting

* <u>NOTE: When requesting a warranty replacement you will be asked to give the unit's serial number from the back of the unit.</u>

Video Troubleshooting	
No Picture and Sound	To change between Portrait and Landscape mode, press ALT-i (Portrait Inverted CrossyRoad 42" version) or ALT-L (Landscape) using a USB keyboard.
	There are loose or faulty connections between the monitor and the computer. Make sure the DVI cable is connected properly to both the computer and to the DVI connector of the LCD monitor.
	No power to computer. • Verify that the computer is powered ON. • Open the service door and press the RED or WHITE power button. • Make sure that the power plug is well connected.
	The Bios settings have changed, If the computer does not power automatically when the unit is powered on, follow these steps: • Open the cabinet and plug a USB keyboard in one of the remaining USB ports. • Press and hold the "Delete" key on the keyboard and then turn the computer on. Keep holding the "Delete" key until the Bios screen appears. • Using the arrows, select the "Advanced" tab. • Using the arrows, scroll down to the Chipset Configuration option and press the "Enter" key. • Using the arrows, scroll down to the Restore on AC/Power Loss option and press the "Enter" key. • Using the arrows, select the Power On option and press the "Enter" key. • Press the "F10" key then the "Enter" key to exit the Bios screen.

Audio Troubleshooting

Low Volume / No Sound	Increase the volume in the game by pressing the Operator Button and adjusting the volume options in the Operator Menu. You might also Quit the game to Windows desktop and increase the volume via the 🔊 Speaker icon on the bottom right of your screen.
	Verify that the 1/8'' plug is plugged in the computer's green sound input jack and that the other end is plugged in the sound amplifier. To verify if it's plugged properly, power up the unit and try touching the plug at the computer's end. If you hear a grounding sound it is connected.
Dongle not found	The USB License Dongle can't be found. Make sure that the USB Dongle is connected to the computer in a black USB port.

Wireless Internet Configuration

Your network can be configured via Ethernet cable or Wireless 802.11b/g.

If you have an Ethernet cable available to be plugged in, insert it into the motherboard LAN RJ45 connector.
If not, here's how to configure your wireless network with your own existing Wi-Fi network.

-Start the unit.

-There will be Adrenaline Amusements wallpaper with a 150 seconds delay before the attract mode shows up. It gives enough time for a wireless network to connect.
(*This delay will be present on each reboot if you don't connect your unit to the Internet*)*.

-Open the coin door and press the Operator button.

-Choose QUIT to Windows.

-Connect the USB keyboard and USB mouse.

- Open Connect to a Network by clicking the network icon (📶) in the lower right corner of the screen.

-In the list of networks, click the network you want to connect to and click connect.

-Enter your security key.

-Once connected, double-click the CrossyRoad shortcut on the desktop.

Having your unit connected to the Internet includes free software live update!

*If you do not connect your unit to the Internet, you can double-click the Disable_Network shortcut on the Windows desktop to bypass the 150seconds Internet lookup delay.

Operator Settings keeps resetting trouble

The Windows write cache needs to be disabled.
-Exit the game to Windows.
-Press on Start
-Right click on My Computer
-Choose Properties
-Click on Device Manager
-Expand Disk Drives
-Double click the **32GB Device** Hard Drive (_Not the USB flash drive_ _if there is one_)
-Go to Policies
-Remove the check in front of "Enable Write caching on the device" as seen below, press OK and then YES to reboot the computer.
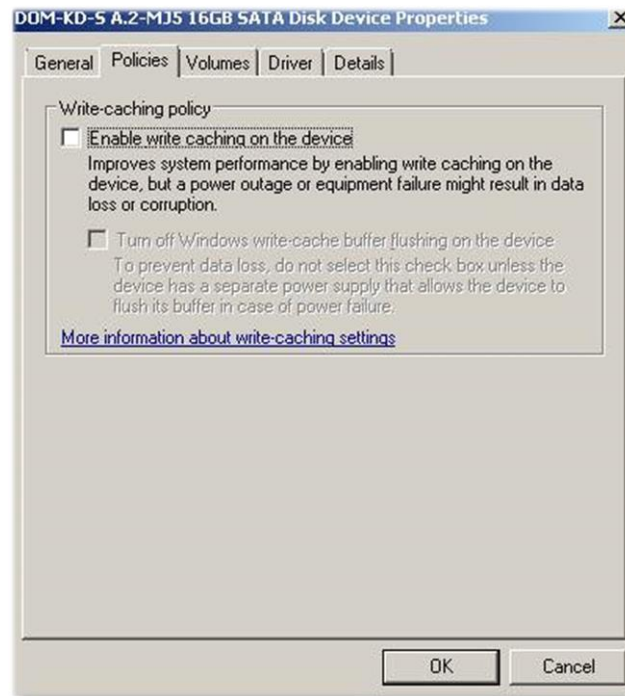

If you have a screen that look like this one
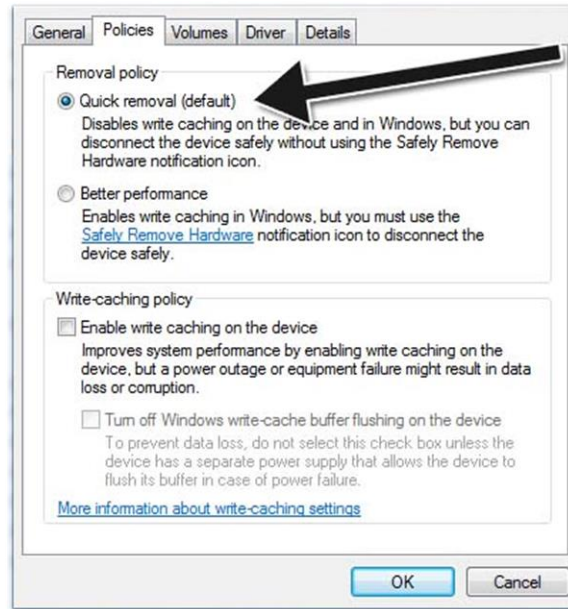

Power off the computer and change the hard drive SATA cable connector and use one of those 2 SATA connectors on the motherboard identified by the green checkmarks.
Power on the unit and redo the instructions to disable the Write Cache from the previous page.

Chapter 08 – Diagrams & Schematics

Power Distribution
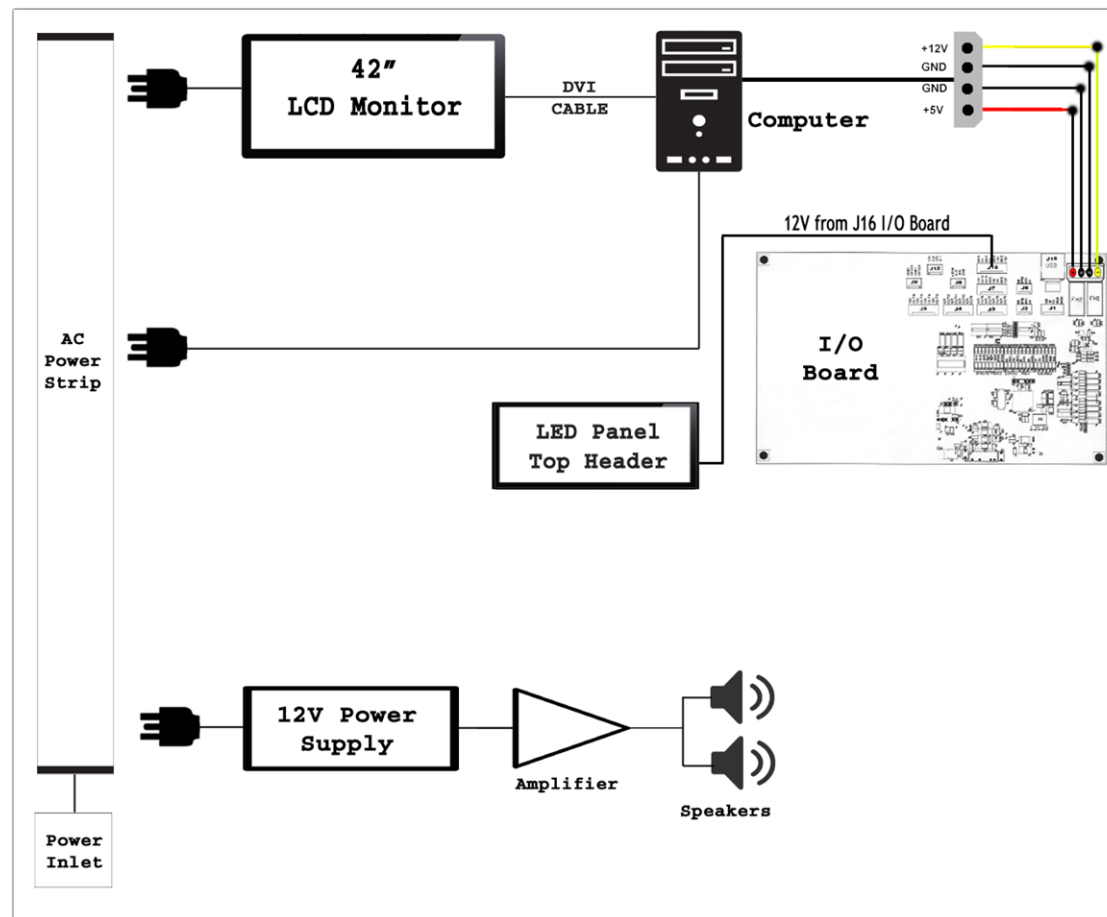

IO Board Wiring Diagram
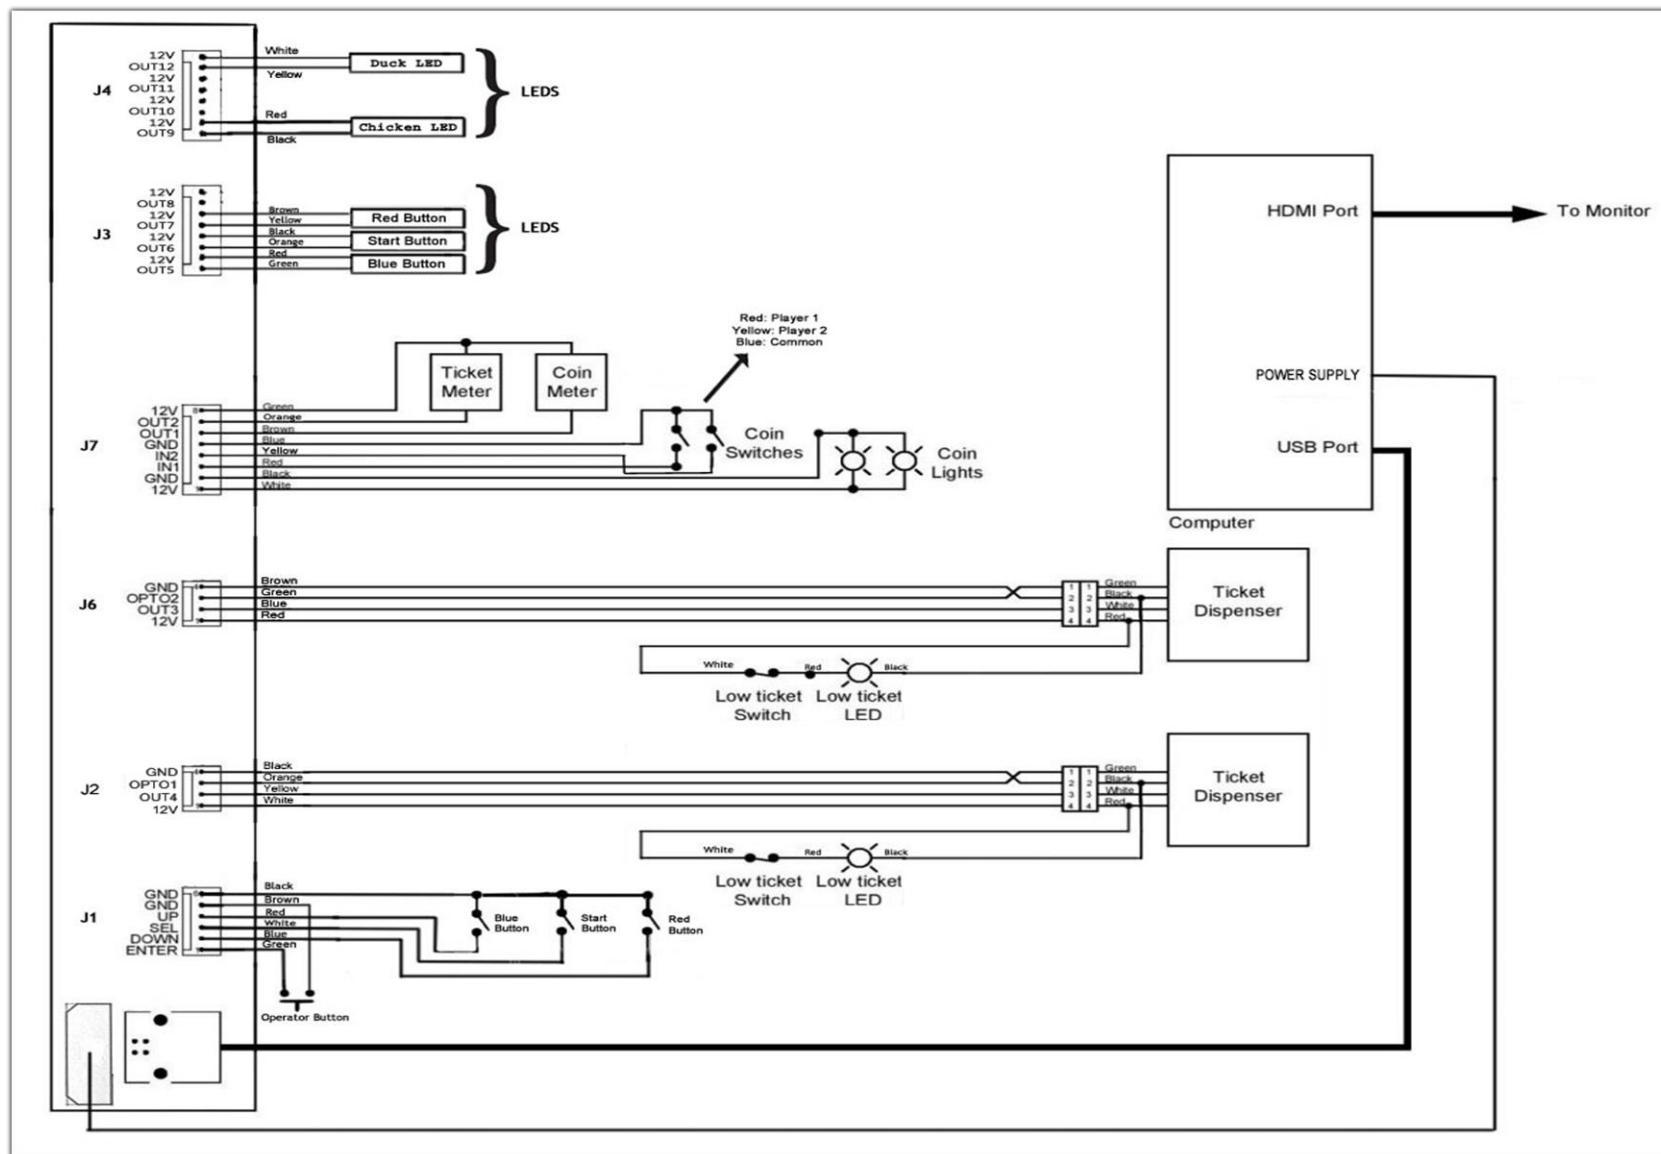

Chapter 09 – Software Recovery

If your unit software needs to be restored please follow those instructions.

- Connect a USB keyboard to the motherboard.
- Verify that the USB Recovery flash disk is in a **_Black_** USB port.
- Power on the unit.
- Press F11 on your keyboard when the AsRock splash screen is displayed to enter the boot menu.
- Choose _USB:_ and press Enter.
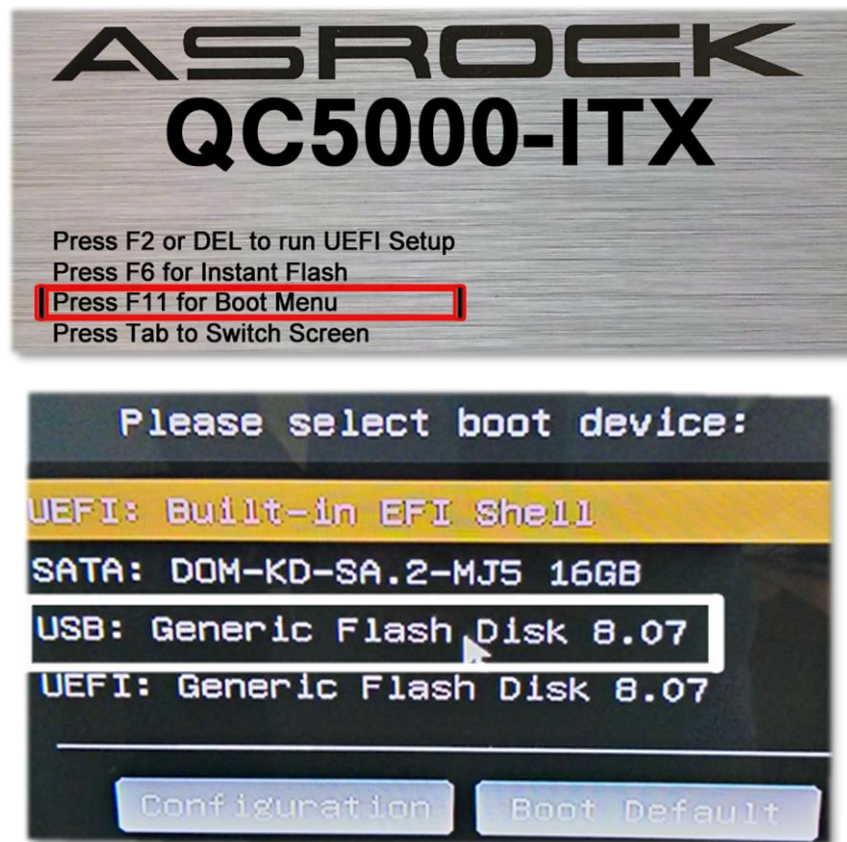

The process takes 25-30minutes and the unit will reboot back in the game at the end. The Wireless credentials will need to be re-entered and Operator settings will be back at the default ones.

Chapter 10 – Card Reader

If you use a card reader system, it is important to follow those instructions.

You need to install 2 card readers, one for each player. You can install them on the acrylic dash
by gently drilling into the dash.
Configure your Operator settings as seen in Chapter 4.
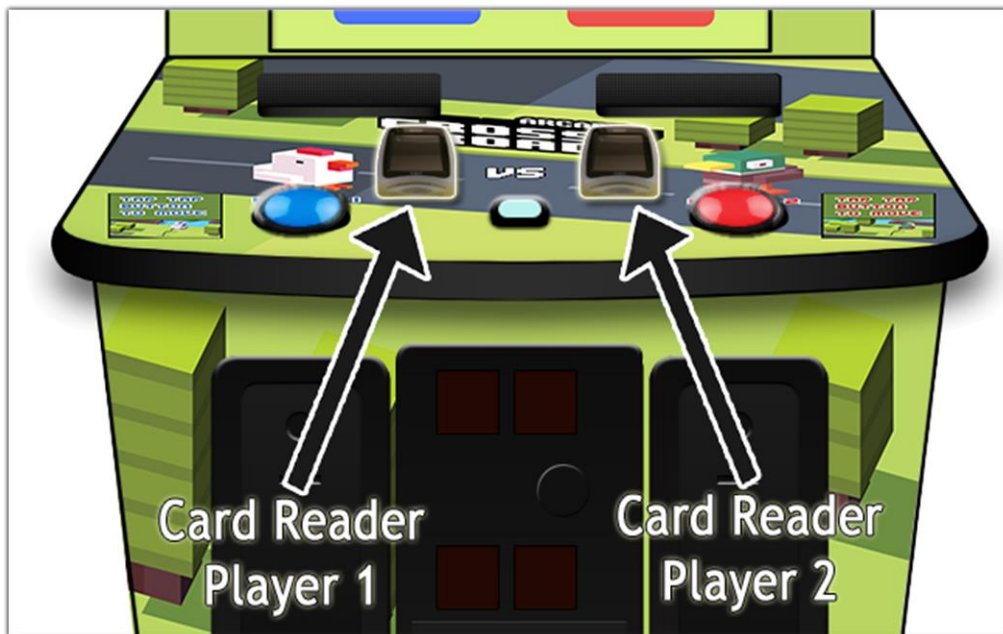

Embed System

If you are using an Embed system, you need to connect your harnesses to Adrenaline Amusements I/O board & harnesses. You should refer to the Embed instructions manual for wiring pin-out but here's Embed V5 example:

Pin		Wire Color	Signal	I/O	Pin		Wire Color	Signal	I/O
1		Orange	12 VDC	I	2		Orange	12 VDC	I
3		Black	Ground	O	4		Black	Ground	O
5					6				
7		Orange/Black	Coin NO	O	8		Yellow/Black	Coin COM	O
