5.Quick Trouble Shooting

Machine can not boot, no electricity

Please check whether 220V/110V power cable is connected well.

| Cable connected well | Cable bad connected, re-plug the cable |

Please check whether the power supply cable is connected well

| If cable is connected well, but the LED light of the power supply is off, then power supply has problem (Test way: Please use the multimeter to check if the power supply has output voltage) | Cable bad connected, re-plug the cable |

Power on machine, LED light is working, but monitor has no display.

Please check whether the game box cable is connected well.

Cable connected well

Cable bad connected, re-plug the cable

Reboot the machine & wait for 1 minute then insert coin

If machine can not accept coin or machine has no voice after inserting coin, the game box has problem

If machine can accept coin and has voice, please check whether the driver board cable is connected well, if connected well, then the drive board or the monitor has problem.

Machine has no voice during playing

Please check whether the speaker cable was connected well.

Cable connected well	Cable bad connected, re-plug the cable

It might be the problem caused by speaker or game box.
(Test way: Please replace a good speaker, if machine has voice, then the speaker is broken. Or it's the game box's problem)

Coin accepter can't accept the coin or accept coin but machine doesn't work

Please check whether the coin accepter cable is connected well.

Cable connected well	Cable bad connected, re-plug the cable

Please replace another coin accepter, if coin accepter is working, then it is the game box's problem.
