Chapter 01 - Preface

Please read this page before preparing your Rabbids Hollywood Arcade product for game play.

The following safety instructions apply to all game operators and service personnel. Specific warnings and cautions will be included throughout this manual.

Use the following safety guidelines to help protect the system from potential damage and to ensure your personal safety:

- Electronic components in the game cabinet run on 110V AC 60Hz (220V/ 50Hz in most of Europe, the Middle East and the Far East delivered units).
- To help prevent electric shock, plug the system into a properly grounded power source. These cables are equipped with 3-prong plugs to help ensure proper grounding. Do not use adapter plugs or remove the grounding prong from a cable. If you must use an extension cable, use a 3-wire cable with properly grounded plugs. We do recommend a 15A rated current or higher power cord.
- To help protect your system from sudden increases and decreases in electrical power, use a surge suppressor, line conditioner or Uninterruptible Power Supply (UPS).
- Be sure nothing rests on the system's cables and that the cables are not located where they can be stepped on or tripped over.
- Keep your system far away from radiators and other heat sources.
- Do not block cooling vents.

Precaution for Game Operation

Adrenaline Amusements Inc. assumes no liability for injuries incurred while playing our games.

Operators should be aware that certain health and physical conditions may make people susceptible to injury when playing video games.

Safety

To avoid electrical shock, unplug the cabinet before performing installation or service procedures.

If a power cord is damaged, it must be replaced by the equivalent power cord available from your distributor.

Adrenaline Amusement Inc. assumes no liability for any damages or injuries incurred while setting up or servicing the cabinet. Only qualified service personnel should perform installation or service procedures.

Environmental Conditions

Cabinet is intended for indoor use only. Be sure to keep the cabinet dry and maintain operating temperatures of 59° - 86° F (15° - 30° C).

Operating & Voltage

| Voltage | Operating |
|---------|-----------|
| 110V AC | 4.0 AMP |
| 220V AC | 2.0 AMP |

Maintenance Warning

You should be very careful when touching the screen material as it is relatively easy to scratch.

If the screen is dusty, use a feather duster. If this is not enough use a damp cloth and wipe carefully sideways following the direction of the lens structure. If rubbing too hard, you risk damaging the screen material and making a noticeable mark.

Chapter 02 - Game Features

Are you a sharp shooter?

Then feast your eyes and take aim on Rabbids Hollywood, a four-player shooting gallery experience filled with boss fights, power-ups and (of course!) your favourite edgy Rabbids humour! Compete with buddies on the Rabbids takeover of Hollywood movie sets!

How to Play

- Shoot the Rabbids!
- Shoot the power-ups and get an automatic plunger shooter!
- Shoot all the crazy creatures during a four-player adventure and explore 3 different movie sets!

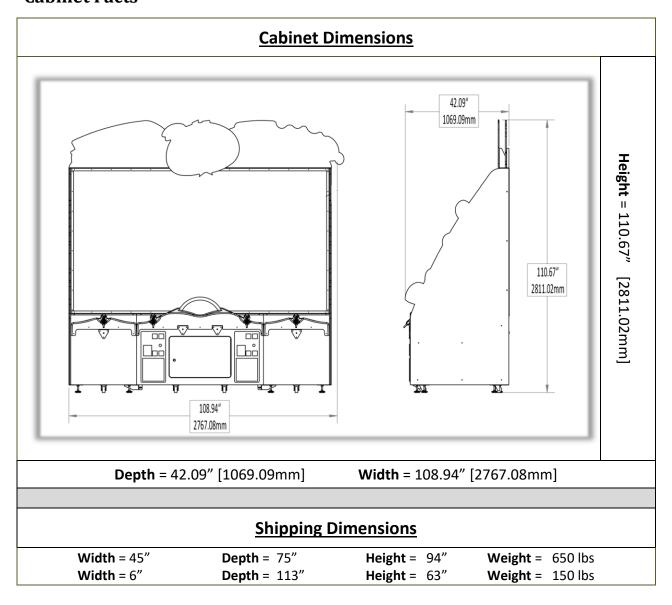

Chapter 03 – Unit Features

Hardware Features

- 4 Players Game
- 120 inches Screen
- Unique Sensor Tracker "Gun" Technology!

Cabinet Facts

Chapter 04 – Unit Installation

Parts Included

Large bag with bolts & washers for assembly

- 30x Black Allen Button Head Bolts #10-24 x 11/2"
- 30x Black Washers #10
- 2x Black Allen Button Head Bolts 1/4-20 x 3/4"
- 2x Black Washers 1/4"
- 6x Black Allen Button Head Bolts #10-24 x 3/4"
- 7x Black Phillips Screws #8 x ¾"
- 1x Left Cabinet
- 1x Center Cabinet
- 1x Right Cabinet
- 1x Left Side Panel
- 1x Right Side Panel
- 1x Center Header
- 1x Left Header
- 1x Right Header

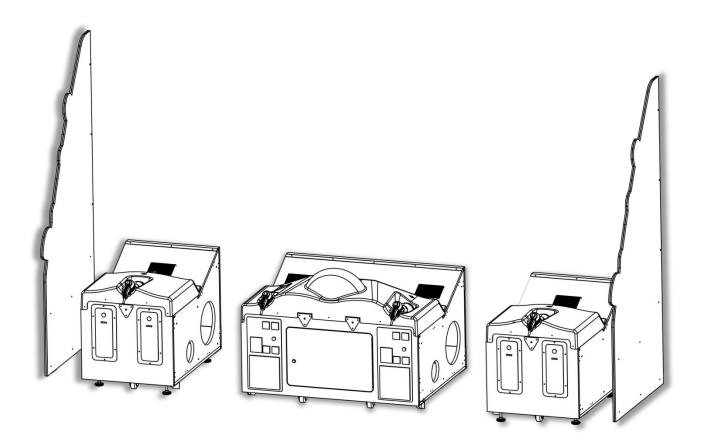

Assembling your Rabbids Hollywood Unit

You need to be 3 people to assemble the unit

- 1. Carefully remove the cabinets from the shipping skids, giving you enough space.
- 2. Move the 3 cabinets and the side panels to the desired location.

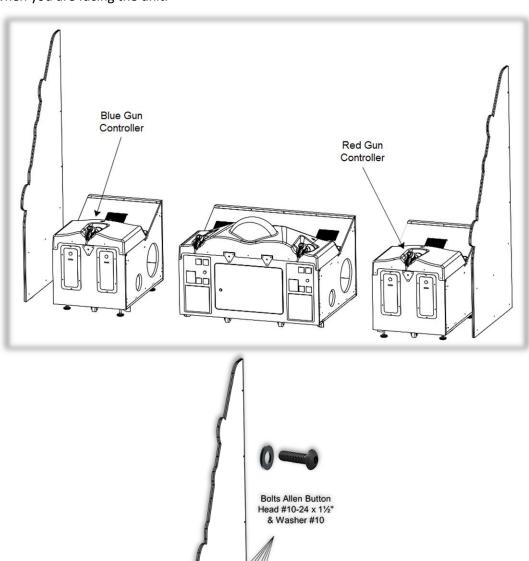

Cabinet & Side Panels Assembly

3. Install the side panel with the cabinet by using the Allen button head bolts $#10-24 \times 1\%$ " and washers #10.

Each side needs 6 bolts.

*The Blue gun controller cabinet is on the left and the Red gun controller cabinet is on the right when you are facing the unit.

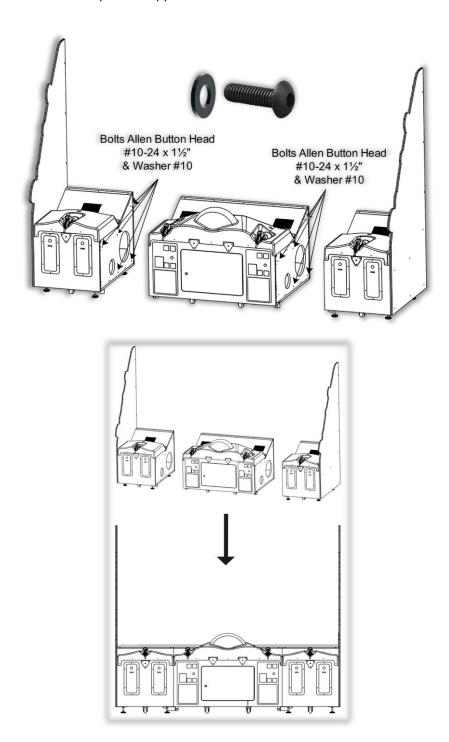

4. Assemble the cabinet together using the provided 10X Bolts Allen button head #10-24 x $1\frac{1}{2}$ " & washers #10.

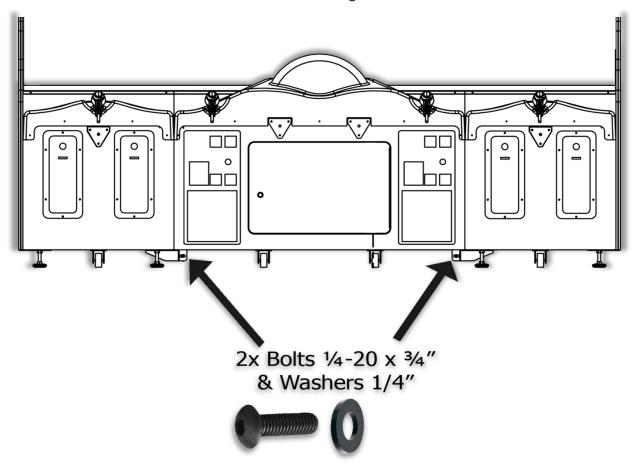

Remove the back cabinet service doors. The bolts need to be inserted from the center cabinet towards the exterior ones.

You will also need to open the upper coin door from the center cabinet to install bolts there too.

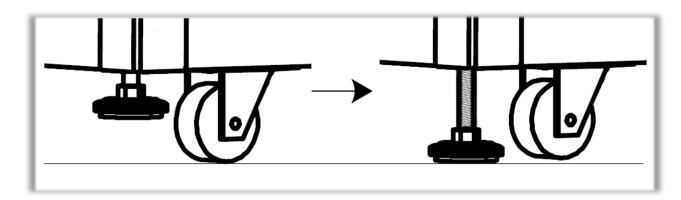

5. Under the cabinets, locate and install the provided 2x Allen button Head Bolts $\frac{1}{4}$ -20 x $\frac{3}{4}$ " with the washers $\frac{1}{4}$ " to hold and secure the cabinets together.

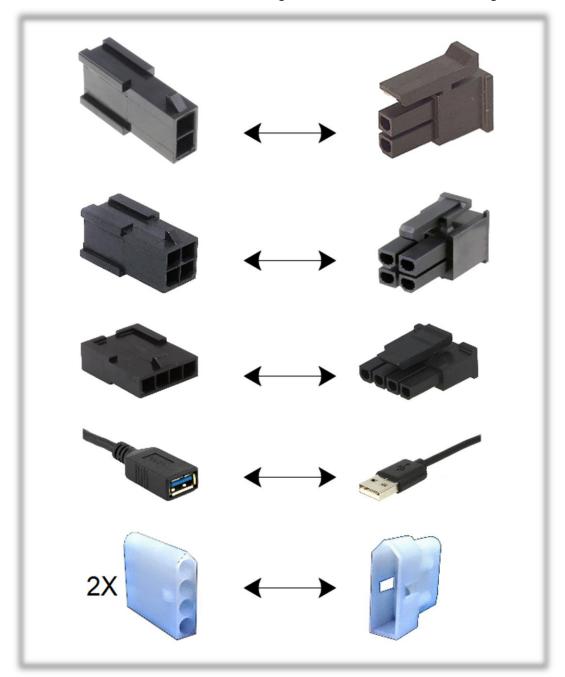

6. Lower the Level adjustors until the Pivot Wheels are slightly above the floor.

7. Connect the 6 harnesses between the edge cabinets to the center cabinet together.

*Match the colors wires for the 2X Ticket Dispensers connectors.

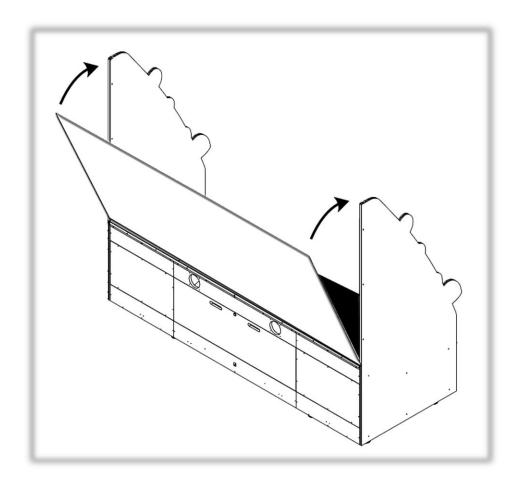

You should be very careful when touching the screen material as it is relatively easy to scratch.

If the screen is dusty, use a feather duster. If this is not enough use a damp cloth and wipe carefully sideways following the direction of the lens structure. If rubbing too hard, you risk damaging the screen material and making a noticeable mark.

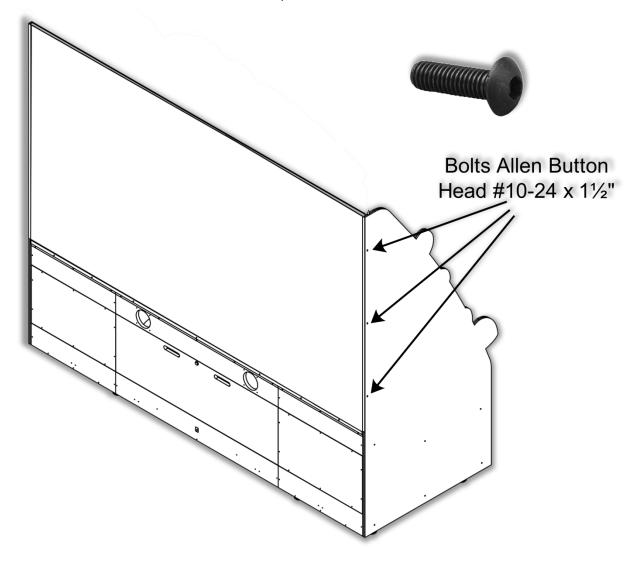

8. *3 people minimum required*

Align the bottom of the screen to the upper back edge of the cabinet. Flip it between the side panels.

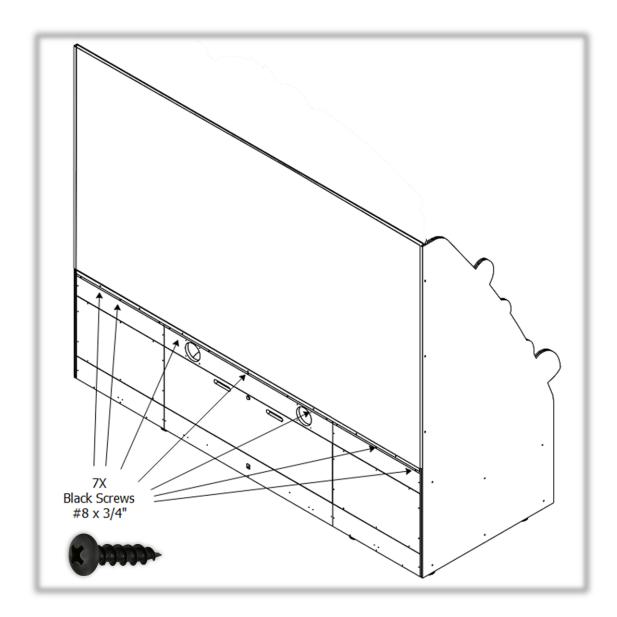

9. Using the #10-24 x $1\frac{1}{2}$ " Allen Head Buttons Bolts (3 on each side), affix the screen to the side panels of the cabinet.

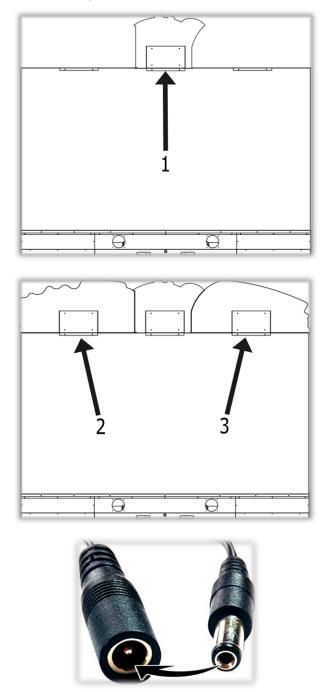

10. Secure the metal bottom plate of the screen to the cabinet by using the 7x black Philips screws $\#8 \times \frac{3}{4}$ ".

11. Using the black Allen Button Head bolts #10-24 x $\frac{3}{4}$ ", install the header by installing the center first.

Then install each side and finally connect the 12V barrel connectors on the right.

Chapter 05 – Operator Menu

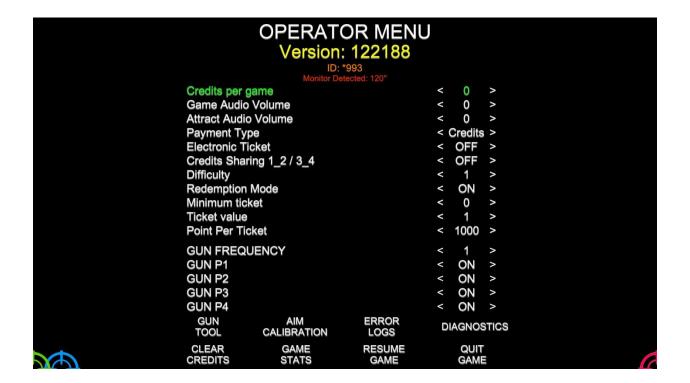

Operator Menu

Access the Operator Menu by pressing the Operator button located inside the drawer on the I/O board directly.

Oper: Open the Operator Menu **Up:** Scroll Up & Increase Value

Down: Scroll Down & Decrease Value

Select Button: Select/Deselect

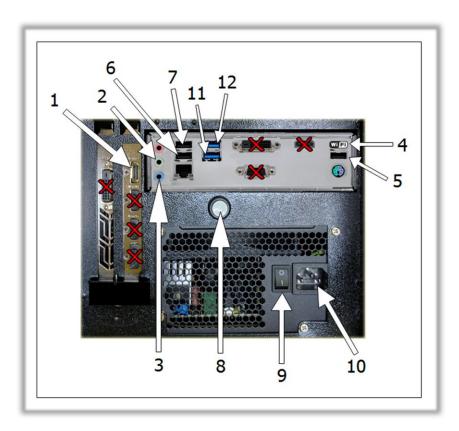

| Operator Menu | <u>Values</u> | What It Does |
|-----------------------------|---------------|---|
| Credits Per Game | 1-20 | Adjusts the number of credits required to play. "0" sets the unit in free play mode. |
| Game Audio Volume | 0-20 | Adjusts the in-game audio volume. "0" will mute the game. |
| Attract Audio Volume | 0-20 | Adjusts the audio volume of the attract loop. "0" will mute the attract loop. |
| Payment Type | Credit / Card | Changes the credit type. "Credits" = Coins and "Card" = Card Reader. This will change the in-game text accordingly. |
| Electronic Ticket | On/Off | "On" will enable the card reader's electronic tickets. "Off" will enable paper tickets. |
| Credit Sharing 1_2 / 3_4 | On / Off | Adjusts the credit sharing option between each player. (Off: Sharing Disabled // On: Sharing Enabled) If you have Card Reader (4X) please use OFF. |
| Difficulty | 1-5 | Adjusts the Difficulty Level (1 is Easiest, 5 is Hardest). |
| Redemption Mode | On / Off | Adjusts the redemption mode. This will change the ingame text accordingly. |
| Minimum Ticket | 0-20 | Adjusts the minimum number of tickets dispensed per play. |
| Ticket Value | 1-2 | Adjusts the value of physical tickets. Physical tickets are either worth "1" ticket or "2" tickets. |
| Points Per Ticket | 500-5000 | Adjusts the value by which the final score is divided to determine ticket redemption. |
| Gun Frequency | 1 | If you have 2 units close to each other select a different frequency. |
| Gun P1 | On / Off | Gun Operating Mode (On: Working Off: Not Working) |
| Gun P2 | On / Off | Gun Operating Mode (On: Working Off: Not Working) |
| Gun P3 | On / Off | Gun Operating Mode (On: Working Off: Not Working) |
| Gun P4 | On / Off | Gun Operating Mode (On: Working Off: Not Working) |
| Gun tool | | Calibration tool to test the gun's response to the player's movements |
| Aim Calibration | | Opens a calibration tool for each player's target |
| Error Logs | | Displays the previous errors |
| Diagnostics | | Test for each gun's triggers and vibration |
| | | Test for each button |
| Clear Credits | | Resets the Inserted credits to 0 if more than 40 credits are entered. |
| Game Stats | | Shows the Stats Screen. |
| Resume Game | | Exits the Operator Menu and returns to the game. |
| Quit Game | | Exits the game and returns to the Windows desktop. |

Chapter 06 – Service & Repair

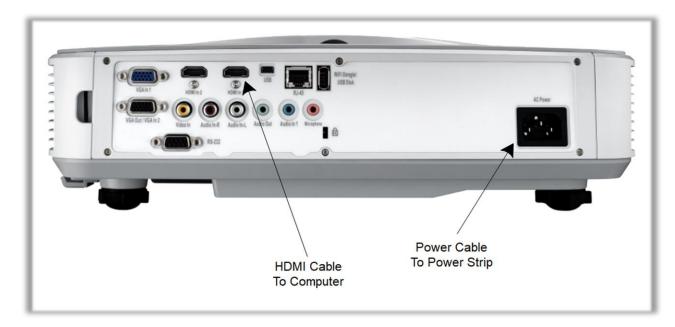

Computer Connections

| <u>No</u> . | <u>Description</u> |
|-------------|--|
| 1. | HDMI Cable to Projector HDMI-1 Connector |
| 2. | Audio Jack to Amplifier #1 |
| 3. | Audio Jack to Amplifier #2 |
| 4. | USB Wi-Fi Adapter |
| 5. | USB Restore Flash Drive |
| 6. | USB To HUB USB |
| 7. | USB To Base Station |
| 8. | Power Button |
| 9. | AC Power Switch |
| 10. | AC Inlet Power Supply |
| 11. | USB License Dongle |
| 12. | USB Port to I/O Board |

Projector Connections

Projector Settings

Recommended Projector Picture Settings

Here are new recommended settings to improve the screen display from the projector.

To adjust the projector settings, open the center cabinet service door and use the remote control. There are 2 IR receivers on the projector, 1 on the back and 1 on the top.

-Press the Menu Key on the remote control.

From the main Picture screen, change the 3 following settings.

Brightness: 60 Contrast: 76 Gamma: 3

To adjust the focus, use the Focus Adjustment Switch on the right of the projector.

Plunger Controller ID Configuration

Each controller has an ID # to be identified as Player 1 to Player 4. When a Stem Stick Controller is replaced and/or has a wrong ID, it needs to be reconfigured.

Instructions:

Open the Operator Menu and exit the game to the Windows desktop.

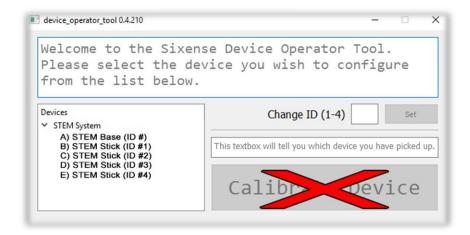

On the Windows desktop you have an icon shortcut called "Magnetometer Calibration Compass" (2017-May 2018) or "Controller ID Configuration" (June 2018-...).

Double click on the icon shortcut to start the program.

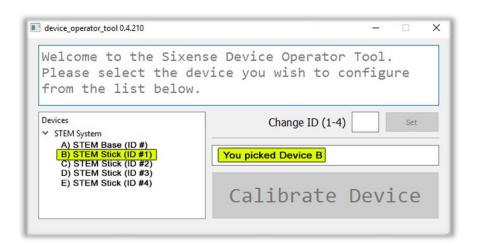

You do not need to use the Calibration button anymore as this is now handled by the game itself. (Visible only on Magnetometer Calibration program)

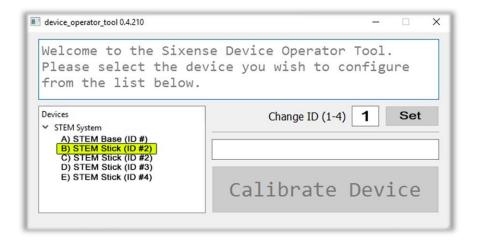

When you pick up a Plunger Gun controller from its holster it should display which device has been picked up.

If you have 2x Stem Stick with the Same ID, you can find the one that needs to be reconfigured to its good ID.

To reconfigure an ID, double click with the mouse to select the good Stem Stick ID.

Click in the "Change ID (1-4)" box with your mouse and enter the good ID number (1 to 4) that matches the player position.

In this example, the Device B is wrongly set to ID#2, so we enter the number "1" and click on Set to change it to Player 1.

Troubleshooting

* NOTE: When requesting a warranty replacement you will be asked to give the unit's serial number from the back of the unit.

Video Troubleshooting

There could be loose or faulty connections between the projector and the computer.

Make sure the HDMI cable is connected properly to both the computer and to the projector.

No Picture or Display Problem

Verify that the projector is powered on.

If not, try to power on the projector by using the remote or by pressing the power button on the projector.

Verify that the Computer is powered on.

The fan on the side of the computer case should be spinning as a reference, if it's not spinning press the Power Button on the front of the computer.

Audio Troubleshooting

Increase the volume in the game by pressing the Operator Button and adjusting the volume options in the Operator Menu. You might also Quit the game to Windows desktop and increase the volume via the Speaker icon on the bottom right of your screen.

Low Volume / No Sound

If the sound comes from the projector integrated speaker it needs to be changed in Windows. Quit the game to the Windows desktop.

Right click on the speaker icon and select Playback Devices. Select the Speakers and choose "Set default", then click OK.

Verify the wirings behind the speakers and the amplifiers.

Verify that the 1/8" audio jack is plugged in the computer's sound input jack and that the other end RCA's are plugged in the sound amplifier.

Wireless Internet Configuration

Your network can be configured via Ethernet cable or Wireless.

If you have an Ethernet cable available to be plugged in, insert it into the motherboard LAN RJ45 connector.

If not, here's how to configure your wireless network with your own existing Wi-Fi network.

- -Start the unit.
- -There will be Adrenaline Amusements wallpaper with a 150 seconds delay before the attract mode shows up. It gives enough time for a wireless network to connect. (This delay will be present on each reboot if you don't connect your unit to the Internet)*.
- -Open the service door and press the Operator button.
- -Choose Exit/Quit to Windows.
- -Connect the provided USB hub and into it the USB keyboard and mouse.
- Open Connect to a Network by clicking the network icon (in the lower right corner of the screen.
- -In the list of networks, click the network you want to connect to and click connect.
- -Enter your security key.
- -Once connected, double-click the GameLauncher shortcut on the desktop.

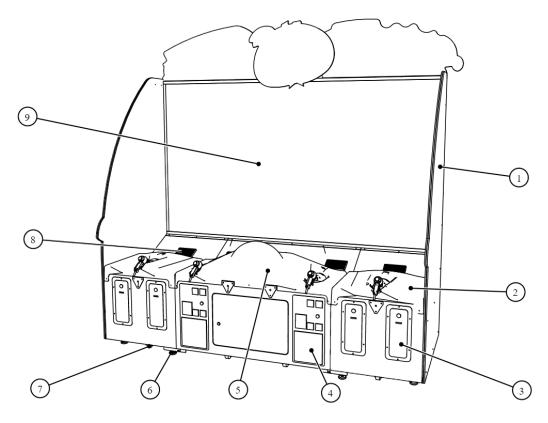

Having your unit connected to the Internet includes free software live update!

*If you do not connect your unit to the Internet, you can double-click the Disable Network shortcut on the Windows desktop to bypass the 150seconds Internet lookup delay.

Chapter 07 - Parts

Power Distribution Schematics

Chapter 09 – Software Recovery

If your unit software needs to be restored please follow those instructions.

- Connect a USB keyboard to the motherboard.
- Connect the provided USB Recovery flash disk is in a **Black** USB port.
- Power on the unit and press F8 on the keyboard to display the boot menu.
- Choose the <u>UEFI: USB device ~16GB</u>

The process takes 25-30 minutes and the unit will reboot back in the game at the end. The Wireless credentials will need to be re-entered and Operator settings will be back at the default ones.

Chapter 10 – Card Reader

Configure your Operator settings as seen on page 20.

Embed System

If you are using an Embed system, you need to connect your harnesses to Adrenaline Amusements I/O board & harnesses. You should refer to the Embed instructions manual for wiring pin-out.

The typical Embed settings are *Standard* except:

-Ticket Mech Type: Dumb DC

-Drive Polarity: Positive

-Notch Polarity: Negative

-Game ticket notch width = 6 (60ms)

-Game ticket notch spacing = 24 (240ms)

-Game Drive Threshold = 15 (1.5V)

-Drive Debounce = 40ms

Limited Warranty Policies

Customers must provide the unit serial number when claiming any warranty request.

Adrenaline Amusements (AAGames) warrants this Arcade unit (Including accessories) against defects in material or workmanship as follows:

This unit has 1 year warranty against defective hardware from date of delivery.

Other than abuse or improper servicing, Adrenaline Amusements covers at no charge the replacement parts including standard shipping.

Customers have 30 days from delivery date to return back the defective equipment at their fees or they will be billed automatically.

Improper servicing or abuse will VOID existing warranties.

All warranty request needs to be validated with our technical support department.

After the 1 year warranty, Adrenaline Amusements offers repairs & sales services options. Please contact the technical support department for information.
